

PRESS RELEASE

0Hüfingen, June 15, 2024 - The employees of FB Food experienced an unforgettable company excursion to the TKE test tower in Rottweil.

The day began with a refreshing welcome drink at the company parking lot in Hüfingen, followed by a group photo in the new FB Food T-shirt.

The bus ride from Hüfingen to Rottweil was full of anticipation and excitement. Once they arrived at the TKE test tower, the first stop was high up on the top plateau, where the employees were able to enjoy the breathtaking view over the region. The TKE test tower is not only the world's tallest of its kind, but also a fascinating structure that is driving forward new elevator technologies.

The evening program took place on the 27th floor at a height of 213 meters, where Nadja Fesenmeyer welcomed everyone once again. She reviewed the past year with all of the company's expansions and thanked the employees for their continuous efforts. Looking ahead to the coming year, she outlined the company's planned expansions and goals.

In addition to music, a talented magician provided entertaining moments and amazed the guests with his skillful tricks. Doris Fesenmeyer also honored two long-serving employees and bid farewell to a colleague on his well-deserved retirement, paying tribute to their commitment and many years of cooperation.

After an impressive view of the illuminated surroundings at night, all participants returned by bus at the end of the evening. The company excursion was a complete success and will be happily remembered by all participants.
