

## PRESS RELEASE

Highest level of IFS certification achieved once again

Hüfingen, May 16, 2024 - For several years, FB Food GmbH has regularly undergone the strict and intensive IFS certification audit on a voluntary basis. This year, the company was once again awarded the esteemed “higher level” status.

The International Featured Standard (IFS) is a globally recognized standard for the food industry that guarantees the safety and quality of food. IFS certification covers various criteria such as hygiene, product quality, process management and traceability. By passing the audit, FB Food GmbH demonstrates that it meets the highest standards in terms of food safety and quality.

“We are proud to have successfully passed the IFS standard,” says Nadja Fesenmeyer. “Our team works hard every day to ensure that our products continuously meet the strict requirements and that our customers receive safe and high-quality products.”

**About FB Food GmbH:**

FB Food GmbH is an innovative and flexible family business that manufactures cereals and cereal products. Thanks to our short lines of communication, flat hierarchies and more than 50 dedicated employees, we can optimally implement individual customer requirements - from standard products to customized special products. Our modern new building, designed to meet the highest environmental standards, enables us to manufacture high-quality products and at the same time make a contribution to environmental protection. As an IFS and Bio-certified company, we attach great importance to product safety and confidentiality. We are a proud member of the "Climate-friendly SME Initiative", because sustainability and commitment to our region are matters close to our hearts. With our central location in southern Germany, we supply customers worldwide. From the initial idea to logistics, we offer our customers and partners everything from a single source.
